OUR SUSTAINABILITY POLICY

We identify our impacts on environment so as to preserve environment and meet the requirements of a sustainable tourism and then we bring our adverse impacts, possible threats and wastes under control. We endeavour to minimize use of natural resources, energy consumption and air, water and soil pollution.

We comply with published law, regulation, legislation and rules related to environment, occupational health safety and human rights and we meet all the requirements.

We take necessary precautions and bring them into life in order that we can protect our guests and employees against potential injuries or diseases and create good working conditions while carrying out our activities.

We try to make our guests, suppliers; subcontractors and competent authorities internalize our environmental consciousness and social responsibilities as well as our employees.

We cooperate with local governments, suppliers and nongovernmental organizations and contribute to building environmental protection and social responsibility projects.

We take all measures to increase employment, to preserve and enrich natural life in our region.

We also release all of activities we conduct to the public.
